Contents

Contributors *ix*
Preface *xi*

1. Advances in Agronomy Quantifying Processes of Pedogenesis **1**
Uta Stockmann, Budiman Minasny, and Alexander McBratney

1. Introduction 2
2. Conceptual Models of Soil Formation—Factors, Processes, Pathways, Energy 5
3. Soil Weathering and Production 12
4. Soil Mixing—Vertical and Lateral Movements 22
5. Models of Soil Formation Based on the Concept of Mass Balance 33
6. Conclusions 39

Appendix 46
References 68

2. Irrigation Waters as a Source of Pathogenic Microorganisms in Produce: A Review **75**
Yakov Pachepsky, Daniel R.Shelton, Jean E.T. McLain, Jitendra Patel, and Robert E. Mandrell

1. Introduction 76
2. Concentrations of Microbial Pathogens and Indicator Organisms in Irrigation Waters 78
3. Implications of Irrigation Water in Spread of Foodborne Diseases 84
4. Standards, Guidelines, and Risk Assessment 91
5. Fate and Transport of Pathogenic and Indicator Microorganisms in Irrigation Systems 101
6. Management and Control of Produce Contamination with Pathogens from Irrigation Waters 117
7. Research and Development Needs 121

References 123

3. *Quo Vadis* Soil Organic Matter Research? A Biological Link to the Chemistry of Humification **143**
Morris Schnitzer and Carlos M. Monreal

1. Introduction 145
2. Criticism on Soil HS Research 147

3. Extraction of SOM 148
4. Analysis of SOM 150
5. Analysis by Py-FIMS 152
6. Chemical Structure 155
7. Chemical Characteristics of HS 156
8. Spectrometric and Spectroscopic Characteristics of HS 160
9. Effect of Time on the SOM Structure 179
10. New Concepts on the Chemical and Microbial Synthesis of HAs and SOM 180
11. Microbial Humification of Small Organic Compounds into Soil PKs 181
12. Thermodynamic, Energy, and Kinetic Considerations 198
13. PKs and the Central Structure of HS and SOM 202
14. Future Research 205
References 207

4. Zeolites and Their Potential Uses in Agriculture 219

Kulasekaran Ramesh and Dendi Damodar Reddy

1. Origin and History of Zeolites 221
2. Classification of Zeolites 222
3. Structure and Nomenclature of Zeolites 223
4. Physical and Chemical Properties of Zeolites 224
5. Major Natural Zeolites of Agricultural Importance 227
6. Zeolite Nutrient Interactions 227
7. Agricultural Applications 229
8. Researchable Issues 235
9. Conclusions 235
References 235

5. Proximal Soil Sensing: An Effective Approach for Soil Measurements in Space and Time 243

R.A. Viscarra Rossel, V.I. Adamchuk, K.A. Sudduth, N.J. McKenzie, and C. Lobsey

1. Introduction 245
2. Proximal Soil Sensing Techniques 251
3. Proximal Sensors Used to Measure Soil Properties 270
4. Summary 274
5. General Discussion and Future Aspects 274
References 281

6. The Role of Knowledge When Studying Innovation and the Associated Wicked Sustainability Problems in Agriculture **293**

J. Bouma, A.C. van Altvorst, R. Eweg, P.J.A.M. Smeets, and H.C. van Latesteijn

1. Introduction 294
2. Current Problems in Dutch Agriculture 299
3. The Flow of Knowledge When Studying Sustainable Development 300
4. Case Studies 301
5. Discussion and Conclusions 319

References 321

7. Crops Yield Increase Under Water-Limited Conditions: Review of Recent Physiological Advances for Soybean Genetic Improvement **325**

Walid Sadok and Thomas R. Sinclair

1. Introduction 326
2. Crop Water Use and Yield: A Framework for Trait Identification 327
3. Traits Influencing Water Conservation 331
4. Traits Influencing Water Access 339
5. Traits for Special Sensitivities: Nitrogen Fixation Tolerance to Drought 342
6. Concluding Remarks 344

References 345
